## SKILLS

Figma / HTML / CSS(Sass) / JavaScript / Typescript / React / Next.js / Git / Node.js / Express / MongoDB

## EDUCATION

**Next.js and TypeScript** - Udemy - online course / 2024 - 2024

I completed a hands-on course in full-stack web development using Next.js and TypeScript, where I gained experience in building and deploying full-stack applications. During the course, I developed both frontend and backend functionalities, including form validation, database integration, and user authentication.

**Sundsgårdens Folkhöskola -Full Stack Development** / 2024 - 2025

I have learned HTML, CSS(SaSS), and Agile work while also doing a group project. Using GitHub and managed each branch for the group project. Later on, JavaScript, Modern design, libraries, Modern frameworks, and Programming techniques. Learned Back End Development such as Typescript, Node.js, Express, Database and HTTPs

**Front-End Development** - Codecademy - online course / 2022 - 2023

I completed a course preparing for an entry-level front-end developer role, learning HTML, CSS, JavaScript, and React. I built static websites, added interactivity with JavaScript, and applied basic design principles. I also gained experience with Git for version control and the command line, while developing hands-on skills in coding and problem-solving

**Goggle UX design certificate** - Udemy - online course/ 2022 - 2022

Completed training designed for enter-level job readiness. Included UX research fundamentals, empathy map, personas, paper and digital wireframe, and low and high-fidelity prototypes in Figma and Abode XD.

**Kabe high school, Hiroshima, Japan** —High school Diploma 2012 - 2015

- General Course
